Re: PCB Electrical Equipment Storage Extension Approvals

Dear Mr. Silver:

This letter is in response to your September 26, 2006 and October 30, 2006, letters regarding the storage of several transformers and switches from the Colville Indian Power & Veneer located at 1100 8th Avenue, in Omak, Washington. We have reviewed your storage requests that you provided on September 26, 2006 and October 30, 2006, to determine compliance with the polychlorinated bi-phenyl (PCB) regulations at 40 CFR 761, promulgated under the Toxic Substances Control Act (TSCA).

We are granting your requests for storage of the transformers and switches for the purpose of profiling and preparing this equipment for transport and disposal. This extension is granted under 40 CFR § 761.61(c) and 40 CFR § 761.62(c) and will expire on November 3, 2006.

Please contact Daniel Duncan, Regional PCB Program Coordinator at (206) 553-6693 or duncan.daniel@epa.gov, if you have any questions.

Sincerely,

Scott E. Downey, Manager
Pesticides and Toxics Unit
